Cell and Animal Models in Aging and Dementia Research (Journal of Neural Transmission, Supplementa)

Animal models of dementia - Porsolt - 1995 - Drug ...

Research scientists are therefore obliged to validate their models in terms of their similarity to the clinical condition. A second problem is the therapeutic target. Although antidementia drugs are intended to improve cognition in a general sense, the foremost therapeutic targets are the deficits in memory and attention associated with aging. The aging animal would appear to represent the
