In the present subvolume III/27d oxidic compounds with the spinel structure are treated; they include both iron and non-iron oxy-spinels. Besides the magnetic data, physical and chemical properties which are of interest in connection with the magnetism of the spinels, have been given the necessary attention. Systematic surveys help the user of this subvolume to find the substances and the properties he is interested in, and which are included in various parts of volumes III/4, III/12 and III/27.
