[About the Book | A Science of Cities](#)

[About the Book](#) In this book, I suggest that to understand cities we must view them not simply as places in space but as systems of networks and flows. To understand space, we must understand flows, and to understand flows, we must understand networks the relations between objects that comprise the system of the city.

Science of Cities Tool Measures Impact of Cities on ...
Cities, how they form, and the effects of urbanization on the quality of human life must now be treated as a science, said Dr. Joan Clos, UN Under-Secretary-General and Executive Director of UN-Habitat. The unprecedented confluence of climate change, population boom, and the rush to live in cities means that our critical human development will take place in cities.
