The Theory of Max-Min and its Application to Weapons Allocation Problems. Authors: Danskin, J. M.

The Theory of Max-Min and its Application to Weapons ...

The author's first introduction to a problem of Max-Min type occurred at The RAND Corporation about 1951. One side allocates anti-missile defenses to various cities. The other side observes this allocation and then allocates missiles to those cities. If $F(x, y)$ denotes the total residual value of the cities after the attack, with x denoting the defender's strategy and y the attacker's, the problem is then to find $\text{Max Min}F(x, y) = \text{Max} [\text{Min}F(x, y)]$.
